

### PROJECT INFORMATION

Project Title: Village of Santa Clara Ft. Bayard Street Phase 3
Project Type: (NO PROJECT REVIEW) SPECIES LIST ONLY

Latitude/Longitude (DMS): 32.780862 / -108.152900

County(s): GRANT

Project Description: The Village of Santa Clara intends to complete sidewalk and ADA improvements along

Fort Bayard Street located within the village limits and within platted public right of way. The proposed project area is located within Township 18 South, Range 13 West, Section 2. The approximate latitude and longitude coordinates are - 32 degrees 46 minutes 38.54

seconds N, 108 degrees 9 minutes 10.16 seconds W.

#### REQUESTOR INFORMATION

**Project Organization:** 

Contact Name: Deanna Mascarenas

Email Address: deanna.mascarenas@stantec.com
Organization: Stantec Consulting Services Inc.

Address: 6100 Seagull Street NE, Suite 102B, Albuquerque NM 87109

**Phone:** 15053498453

### **OVERALL STATUS**

The information contained within this report comprises the recommendations of the New Mexico Department of Game and Fish (Department) for management and mitigation of proposed project impacts to wildlife and habitat resources; see the Project Recommendations section below for further details. No further consultation with the Department is required based on the project's location and, with implementation of mitigation measures described in the Project Recommendations section below, no adverse effects to wildlife or important habitats are anticipated. However, a Department biologist may be in touch within 30 days if they determine that further review is required.

# About this report:

- This environmental review is based on the project description and location that was entered. The report must be updated if the project type, area, or operational components are modified.
- This is a preliminary environmental screening assessment and report. It is not a substitute for the potential wildlife knowledge gained by having a biologist conduct a field survey of the project area. Federal status and plant data are provided as a courtesy to users. The review is also not intended to replace consultation required under the federal Endangered Species Act (ESA), including impact analyses for federal resources from the U.S. Fish and Wildlife Service (USFWS) using their <u>Information for Planning and Consultation tool</u>.
- The New Mexico Environmental Review Tool (ERT) utilizes species observation locations and species habitat suitability models, both of which are subject to ongoing change and refinement. Inclusion or omission of a species within a report cannot guarantee species presence or absence within your project area. To determine occurrence of any species listed in this report, or other wildlife that may be present within your project area, onsite surveys conducted by a qualified biologist during appropriate, species-specific survey timelines may be necessary.
- The Department encourages use of the ERT to modify proposed projects for avoidance, minimization, or mitigation of wildlife impacts. However, the ERT is not intended to be used in a repeatedly iterative fashion to adjust project attributes until a previously determined recommendation is generated. The ERT serves to assess impacts once project details are developed. The <a href="New Mexico Crucial Habitat Assessment Tool">New Mexico Crucial Habitat Assessment Tool</a> is the appropriate system for advising early-stage project planning and design to avoid areas of anticipated wildlife concerns and associated regulatory requirements.

### Special Status Animal Species within 2000 Meters of Project Area

| Common Name            | Scientific Name        | USFWS (ESA) | NMDGF (WCA) | NMDGF<br>SGCN/SERI |
|------------------------|------------------------|-------------|-------------|--------------------|
| American Bittern       | Botaurus lentiginosus  |             |             | SGCN               |
| Aplomado Falcon        | Falco femoralis        |             | E           | SGCN               |
| Peregrine Falcon       | Falco peregrinus       |             | Т           | SGCN               |
| Elf Owl                | Micrathene whitneyi    |             |             | SGCN               |
| Lewis's Woodpecker     | Melanerpes lewis       |             |             | SGCN               |
| Williamson's Sapsucker | Sphyrapicus thyroideus |             |             | SGCN               |
| Juniper Titmouse       | Baeolophus ridgwayi    |             |             | SGCN               |
| Pygmy Nuthatch         | Sitta pygmaea          |             |             | SGCN               |
| Western Bluebird       | Sialia mexicana        |             |             | SGCN               |
| Bendire's Thrasher     | Toxostoma bendirei     |             |             | SGCN               |
| Sprague's Pipit        | Anthus spragueii       |             |             | SGCN               |
| Loggerhead Shrike      | Lanius Iudovicianus    |             |             | SGCN               |
| Gray Vireo             | Vireo vicinior         |             | Т           | SGCN               |
| Red-faced Warbler      | Cardellina rubrifrons  |             |             | SGCN               |
| Painted Redstart       | Myioborus pictus       |             |             | SGCN               |
| Spotted Bat            | Euderma maculatum      |             | Т           | SGCN               |
| <u>Jaguar</u>          | Panthera onca          | LE          |             | SGCN               |

ESA = Endangered Species Act, WCA = Wildlife Conservation Act, SGCN = Species of Greatest Conservation Need, SERI = Species of Economic and Recreational Importance, E = Endangered, T = Threatened

### Special Status Plant Species within 2000 Meters of Project Area

| Common Name             | Scientific Name      | USFWS (ESA) | NMAC | NMRPCS |
|-------------------------|----------------------|-------------|------|--------|
| Pinos Altos Flameflower | Phemeranthus humilis |             |      | SS     |

NMAC = New Mexico Administrative Code, NMRPCS = New Mexico Rare Plant Conservation Strategy, SS = NM Rare Plant Conservation Strategy Species

## **Project Recommendations**

This report includes a preliminary species list that may be used during early stages of project or conservation planning. Even if this report indicates that your proposed project location would require a custom review from a biologist, **no review will be returned** until additional project details are provided. **To obtain a project review**, please submit additional details regarding the **type** of project, project **objectives**, anticipated project **duration**, **timing** of project construction, the composition and dimensions/quantities of **materials** that will be utilized for project implementation, any **equipment** that will be used, anticipated **ground disturbance** that will occur, wildlife surveys or observations that have occurred on or near the project site, and **any other relevant details** regarding potential effects of project activities on wildlife or wildlife habitat. **Photographs** of the project site are especially useful.

Page 4 of 6 2/13/2023 05:00:02 PM

Although this project report may include management recommendations based on the project location, additional conservation measures may be needed. The Department can not fully assess potential effects and associated management recommendations until a **project type and description** have been submitted and an appropriate **impact buffer** for that project type has been applied. Also, the species list within this report represents an estimation of special status species that could be present at the site of a small-scale project. Species lists for projects that occur across **broader geographic scales** (e.g., one or more counties, multiple habitat types) are more appropriately obtained from the **Department's Biota Information System of New Mexico (BISON-M) database**. Species lists generated by the ERT may contain modeled species distributions in order to predict species occurrences within areas that lack previous wildlife inventories or surveys. This list can be refined using occurrence-based information within BISON-M regarding wildlife-habitat relationships and biological needs for species that might be present within the project footprint.

The proposed project occurs within or near a riparian area. Because riparian areas are important wildlife habitats, the project footprint should avoid removing any riparian vegetation or creating ground disturbance either directly within or affecting the riparian area, unless the project is intended to restore riparian habitat through non-native plant removal and replanting with native species. If your project involves removal of non-native riparian trees or planting of native riparian vegetation, please refer to the Department's habitat handbook guideline for Restoration and Management of Native and Non-native Trees in Southwestern Riparian Ecosystems.

Your project could affect important components of wildlife habitat, including fawning/calving or wintering areas for species such as deer and elk, or general high wildlife movement and activity areas for large mammals. Mitigation measures should focus on high use sites and movement areas based on collar data and expert knowledge of Department of Game and Fish and land management agency personnel. Management recommendations within these areas may include the following.

- Restrictions on noise-generating activities during wintering and calving/fawning seasons, specific timing of
  which may vary throughout the state. These activities would include oil and gas well pad development and
  operations that expose wildlife to loud noises from drilling, compressors, and pumping stations within 400 feet
  of the source.
- Modifying fences along high use areas to make them wildlife friendly and facilitate large animal movement.

Page 5 of 6 2/13/2023 05:00:02 PM

# Disclaimers regarding recommendations:

- The Department provides technical guidance to support the persistence of all protected species of native fish and wildlife, including game and nongame wildlife species. Species listed within this report include those that have been documented to occur within the project area, and others that may not have been documented but are projected to occur within the project vicinity.
- Recommendations are provided by the Department under the authority of § 17-1-5.1 New Mexico Statutes
  Annotated 1978, to provide "communication and consultation with federal and other state agencies, local
  governments and communities, private organizations and affected interests responsible for habitat, wilderness,
  recreation, water quality and environmental protection to ensure comprehensive conservation services for
  hunters, anglers and nonconsumptive wildlife users".
- The Department has no authority for management of plants or Important Plant Areas. The New Mexico
   <u>Endangered Plant Program</u>, under the Energy, Minerals, and Natural Resources Department's Forestry
   Division, identifies and develops conservation measures necessary to ensure the survival of plant species
   within New Mexico. Plant status information is provided within this report as a courtesy to users.
   Recommendations provided within the ERT may not be sufficient to preclude impacts to rare or sensitive plants,
   unless conservation measures are identified in coordination with the Endangered Plant Program.
- Additional coordination may also be necessary under the federal ESA or National Environmental Policy Act (NEPA). Further site-specific recommendations may be proposed during ESA and/or NEPA analyses, or through coordination with affected federal agencies.
